R901388127 CONTROL THROTTLE 2WFCE32S320L-1X/M/24A1 Hydraulic Proportional Valves Bosch Rexroth

Reference: R901388127

Short description

R901388127

Description

The R901388127 CONTROL THROTTLE 2WFCE32S320L-1X/M/24A1 is a high-quality industrial hydraulic valve designed for reliable oil flow regulation at nominal signal value. With high precision due to the internal piston position retraction, this nominal size 32 valve offers superior performance in A → B and B → A applications. The integrated 24 V DC electronic system ensures efficient operation. Original Bosch Rexroth products are locally supported by CreatX Technology SRL.
