R911346977 CONTROL XM2200.01-01-31-31-301-NN-108N3NN Bosch Rexroth

Reference: R911346977

Short description

R911346977

Description

The compact XM control platform, code R911346977, is ideal for various Motion Logic applications. The local connection of the S20 I/O modules extends control for high-performance process connection. Decentralized I/O stations can be easily integrated via a number of fieldbus couplers. Optional extension modules open up further functions. The robust design simplifies handling and allows for a wide range of applications. Original products, local support through CreatX Technology SRL.
