R911369227 Control XM2200 Bosch Rexroth

Reference: R911369227

Short description

R911369227

Description

The compact XM control platform R911369227 is ideal for various Motion Logic applications. The local connection of the S20 I/O modules extends control for high-performance process connection. Decentralized I/O stations can be easily integrated via fieldbus couplers. Optional extension modules provide additional functions. The robust design simplifies handling and allows for a wide range of applications. Original products, local support through CreatX Technology SRL.
