R911370638 CONTROL XM2200.01-01-31-31-301-NN-101NNNN Bosch Rexroth

Reference: R911370638

Short description

R911370638

Description

The compact XM control platform, code R911370638, is ideal for a variety of Motion Logic applications. The local connection of the S20 I/O modules extends the control for high-performance process connection. Decentralized I/O stations can be easily integrated via a number of fieldbus couplers. Optional extension modules open up further functions. The robust design simplifies handling and allows for a wide range of applications. Original products, local support through CreatX Technology SRL.
