R911394741 CONTROL XM4203.21- 21-31-63-301-NN-NNNN- MTXANNNNN Bosch Rexroth

Reference: R911394741

Short description

R911394741

Description

The compact XM control platform, code R911394741, is ideal for various Motion Logic applications. The local connection of the S20 I/O modules extends control for high-performance process connection. Decentralized I/O stations can be easily integrated via multiple fieldbus couplers. Optional extension modules open up further functions. The robust design simplifies handling and allows for a wide range of applications. Technical features: IP20 protection, Intel Core i CPU, dual core, 6th generation, 2.3 GHz, flexible I/O integration, Gigabit Ethernet, USB, SD card slot, diagnostic LED, modular expansion options, Multi-Ethernet, Sercos master or EtherCat I/O, robust design with extended temperature range. Original products, local support through CreatX Technology SRL.
