# **R911410175 CONTROL DEVICE XMD 2-W7070ANN-01NETT0NNNN- S03RSN1NNNN0NN Bosch Rexroth**

**Reference:** R911410175

## **Short description**

R911410175

## **Description**

The XMD2 double-axis inverters in the ctrlX DRIVE series are supplied with DC voltage and generate a controlled AC output voltage with variable amplitude and frequency for the operation of two motors. They are supplied from the DC bus of the XVE2 or XVR2 supply units and/or the XCS2 or XCD2 converters. Via the standard runtime, which enables the realization of most drive tasks, additional optional function packages for demanding applications are available. By means of various ordering options, it is possible to expand the hardware with ctrlX SAFETY for safety-related applications up to SIL3. Original Bosch Rexroth products are locally supported by CreatX Technology SRL, offering technical support and repairs. Technical features: free selection of motor encoder, ideal adaptation to machine requirements, compact design, Plug & Play technology, reduced cabling efforts.
