R911410838 CONTROL DEVICE XMD 2-W1616ANN-02AETM5ECNN- S03RSN2NNNN5NN Bosch Rexroth

Reference: R911410838

Short description

R911410838

Description

The XMD2 double-axis inverters in the ctrlX DRIVE series are supplied with DC voltage and generate a controlled AC output voltage with variable amplitude and frequency for the operation of two motors. The inverters are supplied from the DC bus of the XVE2 or XVR2 supply units and/or the XCS2 or XCD2 converters. Via the standard runtime, which enables the realization of most drive tasks, additional optional function packages for demanding applications are available. By means of various ordering options, it is possible to expand the hardware with ctrlX SAFETY for safety-related applications up to SIL3. Advantages include free selection of the motor encoder or a second encoder, optional multi-encoder interface for resolver, AcuroLink, Hiperface, EnDat 2.2, SSI, ideal adaptation to machine requirements thanks to a broad range of motors: rotary, linear, kit or housing, space-saving design, and Plug & Play technology with ctrlX DRIVE servo drives and motors. Original products are locally supported by CreatX Technology SRL.
