R911411252 CONTROL DEVICE XMS 2-W0023ANN-01NETT0ECNN- S03RSN1NNNN0NN Bosch Rexroth

Reference: R911411252

Short description

R911411252

Description

The R911411252 CONTROL DEVICE XMS2-W0023ANN-01NETT0ECNN-S03RSN1NNNN0NN uses DC voltage to generate a controlled AC output voltage, ideal for motor operation. It is powered from the DC bus of XVE or XVR supply units and/or XCS or XCD converters. Offers advanced functions for demanding applications and can be expanded with ctrlX SAFETY for safety-related applications up to SIL3. Features a compact design, saving space and reducing cabling efforts thanks to single-cable technology. Original product with local support through CreatX Technology SRL.
