R911411590 CONTROL DEVICE XMS 2-W0180ANN-02NETM5ECNN- S03RSN1NNNN5NN Bosch Rexroth

Reference: R911411590

Short description

R911411590

Description

The XMS2-W0180ANN-02NETM5ECNN-S03RSN1NNNN5NN control device, code R911411590, from Bosch Rexroth, is a single-phase inverter powered by DC voltage, generating a controlled AC voltage for motor operation. It is powered by the DC bus of XVE or XVR supply units and/or XCS or XCD converters. It offers extended functionalities through optional packages for demanding applications and supports safety applications up to SIL3 with ctrlX SAFETY. Its compact design saves space, making it ideal for 300 mm control cabinets. The Plug & Play technology and simplified cabling with single-cable technology ensure quick and efficient installation. Original product with local support through CreatX Technology SRL.
