R911412221 CONTROL DEVICE

Bosch Rexroth

Reference: R911412221

Short description

R911412221

Description

The R911412221 control device is a single-axis inverter powered by DC voltage, generating controlled AC voltage for motor operation. It is supplied from the DC bus of XVE or XVR supply units and/or XCS or XCD converters. It offers advanced functions for demanding applications and can be expanded with ctrlX SAFETY for safety applications up to SIL3. It features a wide range of motors and a compact, space-saving design. Key advantages include Plug & Play technology and reduced cabling. Original product, local support through CreatX Technology SRL.
