# **R914503441 CONTROL DEVICE XMV 2-W0050ANC-01NETNNNNN- S03RSN1NNNPNNN Bosch Rexroth**

**Reference:** R914503441

## **Short description**

R914503441

## **Description**

The DC/DC converters from the drive portfolio ctrlX DRIVE are supplied with DC voltage and generate variable DC voltage at the output. The units can be operated in both voltage-controlled and current-controlled manners. Supply and regenerative modes are also possible. There are unit types with different powers and different interfaces available for the application-specific use of the DC/DC converter. Typical fields of application include battery buffer, battery test rigs and simulation, fuel cell applications, and test rigs for DC motors. Optional function packages for demanding applications are available. The drive-integrated control ctrlX CORE can also be integrated into almost all automation applications for implementation. Original products, local support through CreatX Technology SRL.
