Description

The XMD2-W0606ANN-01AETT0NNNN-S03RSN2NNNN0NN control device from Bosch Rexroth provides an advanced solution for dual-axis motor control. Powered by the DC bus of XVE2 or XVR2 supply units, this inverter generates a controlled AC voltage with variable amplitude and frequency, ideal for industrial applications. With hardware expansion options for safety applications up to SIL3 and a wide range of compatible motors, this device ensures perfect adaptation to machine requirements. Plug & Play technology and compact design save space and reduce cabling efforts, offering local support through CreatX Technology SRL.
