R914504681 CONTROL DEVICE XMS 2-C0090ANN-01NETT0ECNN- S03RSN2NNNN0NN Bosch Rexroth

Reference: R914504681

Short description

R914504681

Description

The XMS single-axis inverters are powered by DC voltage and use it to generate a controlled AC output voltage of variable amplitude and frequency for operating a motor. They are supplied from the DC bus of the XVE or XVR supply units and/or the XCS or XCD converters. Via the standard runtime, which enables the realization of most drive tasks, additional optional function packages for demanding applications are available. By means of various ordering options, it is possible to expand the hardware with ctrlX SAFETY for safety-related applications up to SIL3. Advantages include free selection of the motor encoder, compact design, Plug & Play technology, and scalable power. Original Bosch Rexroth products are locally supported by CreatX Technology SRL.
