R914504769 CONTROL DEVICE XMS 2-W0100ANN-01NETT0NNNN- S03RSN1NNNN0NN Bosch Rexroth

Reference: R914504769

Short description

R914504769

Description

The control device XMS2-W0100ANN-01NETT0NNNN-S03RSN1NNNN0NN, code R914504769, is a single-phase inverter powered by DC voltage, generating a controlled AC voltage for motor operation. It is powered from the DC bus of XVE or XVR supply units and/or XCS or XCD converters. It offers extended functionalities through optional packages for demanding applications and can be expanded with ctrlX SAFETY for safety applications up to SIL3. The device perfectly adapts to machine requirements due to a wide range of motors and compact design, ideal for 300 mm control cabinets. Plug & Play technology and reduced cabling with MS2N servo motors ensure quick and efficient installation. Original product, local support through CreatX Technology SRL.
