R914516209 CONTROL DEVICE XMV 2-W0210ANC-01NETNNNNN- S05RSN2NNNPNNN Bosch Rexroth

Reference: R914516209

Short description

R914516209

Description

The DC/DC converter from the ctrlX DRIVE portfolio is supplied with DC voltage and generates variable DC voltage at the output. It can operate in both voltage-controlled and current-controlled modes. Supply and regenerative modes are also possible. There are unit types with different powers and interfaces available for application-specific use of the DC/DC converter. Typical fields of application include battery buffer, battery test rigs and simulation, fuel cell applications, and test rigs for DC motors. Optional function packages are available for demanding applications. The drive-integrated control ctrlX CORE can also be integrated into almost all automation applications for implementation. Original products, local support through CreatX Technology SRL.
