R911173002 CONTROL CML75.1-NP-900-NA-NNNN-NW Bosch Rexroth

Reference: R911173002

Short description

R911173002

Description

R911173002 CONTROL CML75.1-NP-900-NA-NNNN-NW offers an extensive portfolio of scalable embedded control hardware, flexibly extending centralized and decentralized automation topologies. The system can be integrated with the Sercos automation bus and other fieldbus and Ethernet-based protocols. Optional safety and expansion modules enable easy expansion to include SafeLogic control. Benefit from simple, flexible I/O integration, on-board I/O, and the possibility of expansion with function modules (communication, technology, safety). Sercos, PROFIBUS, and Realtime Ethernet communication, with PLC, Motion, and CNC functionalities. Original products, local support through CreatX Technology SRL.
