R900976331 PROPORTIONAL VALVE 4WREE6V04-2X/G24K31/F1V Bosch Rexroth

Reference: R900976331

Short description

R900976331

Description

The R900976331 PROPORTIONAL VALVE 4WREE6V04-2X/G24K31/F1V is a high-quality industrial hydraulic valve, ensuring reliable control of oil flow direction. With remarkable precision due to the internal piston position feedback, this original Bosch Rexroth product is perfect for applications requiring precise control. Nominal size 6 and symbol V ensure superior performance, while the 24 VDC electronic integration guarantees efficiency and durability. Enjoy local support through CreatX Technology SRL.
